AgLogic®
Proven Maximum Performance

COTTON

AgLogic® 15GG aldicarb provides the peace of mind that cotton growers have come to depend on.

AgLogic® 15GG Aldicarb

"AgLogic 15GG is the GOLD STANDARD of performance which all other at-plant technologies are compared."

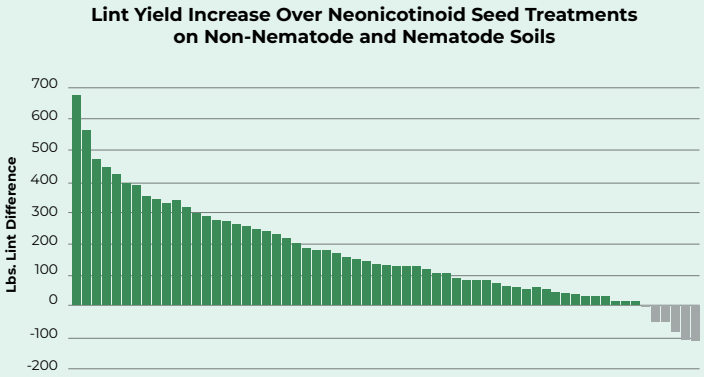

Cotton growers can be confident that they've given their cotton crop a strong foundation by protecting it from early season insects, mites, and nematodes resulting in higher yields and superior lint quality.

- Widest spectrum of early season pest management on the market
- Labeled for at-plant and side-dress applications
- Promotes early season vigor
- Promotes root and canopy growth
- Key component of an IPM Program
- Promotes earliness
- Provides higher yields and profits

4-Year University Trial Summary

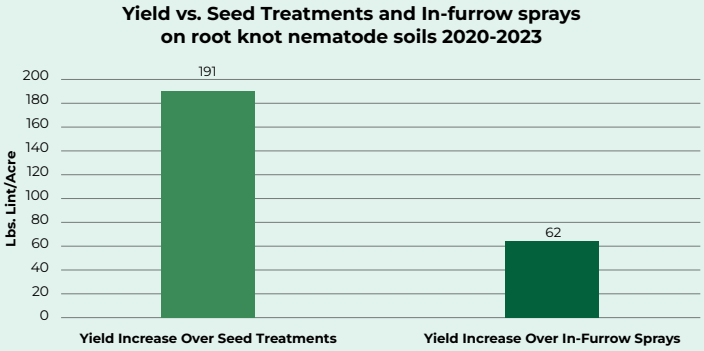

In a summary of 62 university extension field studies conducted across the Cotton Belt from 2020 through 2023, AgLogic 15GG aldicarb out yielded neonicotinoid seed treatments with a summary average of **177 lbs. of lint/acre** in non-nematode and nematode soils.*

Get to the Root of the Problem!

In a subset summary from the field trials above on southern root knot nematode infested soils, AgLogic 15GG at 5 lbs./acre out-yielded neonic seed treatments by **191 lbs./acre** and out-yielded in-furrow sprays by **62 lbs./acre**.*

**Results may vary*

Early Season Insects and Mites

- Rapid systemic activity
- Up to six weeks of control with a single at-planting application
- Reduces need for foliar over-sprays
- Minimizes potential for secondary flare-ups

Nematodes

- Helps protect against early season damage from root-knot, reniform, lesion, Columbia lance and sting nematodes
- Minimizes secondary bacterial diseases associated with nematode infestations

Crop Management Benefits

- Stimulates early plant vigor resulting in optimum nutrient uptake and crop uniformity
- Increased canopy development that can help with weed management
- Crop earliness providing growers a timely and efficient harvest preserving lint quality
